About Me

Assalamualaikum, I am a react frontend developer. I develop interactive and professional looking websites. Moreover, to add all kinds of functionality I use Javascript & react and for styling and responsiveness I prefer Tailwindcss.

Education

- B.Sc in CSE

2018 - present

Brac University

Projects

- Ecommerce website** [\[code\]](#) [\[Live link\]](#)

Project Details :

Fully functional ecommerce website using react, tailwindcss and firebase. Email and google authentication available. All products stored in firebase firestore. Every new product can be uploaded from admin dashboard. Every user can create their own account and add products to the cart and order products. every order is iterable from admin dashboard. every product has a unique id. non of the admins can upload product without unique id.

- Facebook Clone** [\[code\]](#) [\[Live link\]](#)

Project Details :

I made a facebook clone design using nextjs and tailwind. no functionality added

- My Portfolio** [\[code\]](#) [\[Live link\]](#)

Project Details :

I made my portfolio website using reactjs and tailwindcss. All functionality available

- Weather Website** [\[code\]](#) [\[Live link\]](#)

Project Details :

This weather application I made with react, tailwindcss and openweather api

- Movies Catalog** [\[code\]](#) [\[Live link\]](#)

Project Details :

I made this movies catalog website using nextjs tailwindcss and omdb api

- To Do List** [\[code\]](#) [\[Live link\]](#)

Project Details :

This To Do List was made with nextjs & tailwindcss and crud operation also performed.
